Answers for Chapter 9: Memory The Phenomenon of Memory Section Preview 1. To remember any event requires that we somehow get information into our brain (encoding), retain it (storage) as short-or long-term memory, and get it back out (retrieval). These three steps apply not only to human memory but also to other information-processing systems, such as computers.

Chapter 9 (3) Study Guide Answers - Answers for Chapter 9 ...

Memory is essential to all our lives. Without a memory of the past, we cannot operate in the present or think about the future. We would not be able to remember what we did yesterday, what we have done today or what we plan to do tomorrow. Without memory, we could not learn anything. Memory is involved in processing vast amounts of information.
