RV WIRE ROUTING. Sooner or later, you'll want to add some new equipment or a new accessory to your RV. The same techniques can generally be used for fifth wheels, motor homes, campers, and slide-ins.

RV Wire Routing

The wiring used in an RV-C network is a simple twisted pair, installed in a bus topology. A “trunk” is laid (we recommend Raychem 2019E0309 as a 20 gage cable that satisfies the impedance limits), and terminated at each end with a 120 ohm resistor placed across the pair.

Physical Layer: Wiring, Connectors, and Hardware | rv-c.com

RV-C wiring is an example of a “bus topology”. The jargon simply means that RV-C uses one of the simplest possible methods of connecting multiple nodes. A “trunk” line is run through the RV, terminated on each end by a small (120 Ohm) resistor across the pair.

Designing an RV with RV-C.

Knowing what to do when you deal with your RV electrical system is extremely important. Having a little bit of insight into your RVs electrical system is helpful even if you don't want to do any wiring because knowledge is power. Be careful with it, though.
