Fig. 2 illustrates how the amounts of other common building materials — such as wood, steel, asphalt, and brick — are very small in comparison to concrete. These materials generally have a higher environmental footprint than cementitious materials. But beyond environmental considerations, the production of these materials could not be sufficiently increased to replace concrete to any ...

"Transmission tower" is the name for the structure used in the industry in the United States, and some other English-speaking countries. The term "pylon" comes from the basic shape of the structure, an obelisk-like structure which tapers toward the top, and the name is mostly used in the United Kingdom and parts of Europe in everyday colloquial speech.
