Our 300+ member companies produce more than 90 percent of the residential and commercial air conditioning, heating, water heating, and commercial refrigeration equipment made in North America.

AHRI

Most air cooled refrigeration systems are designed so that the refrigerant will condense at a temperature about 25 to 30 degrees above the ambient air temperature around the condenser. Most water cooled systems are designed for 75° to 95° entering condenser water temperature, with 85° being the design temperature.

The refrigeration cycle explained in plain english.
