A key aspect of my work since the late 1970s has been in developing the theory and practice of educational action research. Together with colleagues at Deakin and elsewhere, I have advocated "emancipatory action research" as a participatory form of research and evaluation which embodies the aspirations of a critical science of education.

Methodology, theory, paradigm, algorithm, and method. The methodology is the general research strategy that outlines the way in which research is to be undertaken and, among other things, identifies the methods to be used in it. These methods, described in the methodology, define the means or modes of data collection or, sometimes, how a specific result is to be calculated.

The definition of the concept of time has been associated with ambiguities and even contradictions. For instance, time has been described as "time nothing more than the occurrence of events in sequence, on after another" (Olpin and Hessen, 2012, p.167), and "a resource that, when lost or misplaced, is gone forever" (Kerzner, 2009, p.286).

Introduction. The research onion was developed by Saunders et al. (2007). It illustrates the stages that must be covered when developing a research. strategy. When viewed from the outside, each layer of the onion describes a more detailed stage of the research process (Saunders et al., 2007).. The research onion provides an effective progression through which a research methodology can be designed.
