Cognitive science is the interdisciplinary, scientific study of the mind and its processes. It examines the nature, the tasks, and the functions of cognition (in a broad sense). Cognitive scientists study intelligence and behavior, with a focus on how nervous systems represent, process, and transform information. Mental faculties of concern to cognitive scientists include language, perception ...

For many years our lab has studied moral judgment and decision making. More recently, we've expanded our research to address basic questions concerning the brain's infrastructure for complex thought. This new research on high-level cognition examines how concepts combine to form ideas, how ideas are represented and manipulated through reasoning, the representation of propositional ...

1. Introduction. This paper examines research on school bullying through the lens of sociocultural theorising. Whilst there is a proliferation of empirical research on bullying that has helped us to understand its nature, characteristics, and experiences of those involved (Smith, 2015), we argue that there has been less emphasis in the literature on providing a coherent theoretical ...

Academic publishing is the subfield of publishing which distributes academic research and scholarship. Most academic work is published in academic journal article, book or thesis form. The part of academic written output that is not formally published but merely printed up or posted on the Internet is often called "grey literature". Most scientific and scholarly journals, and many academic and ...
