Reflection. Whenever light reaches the boundary between two substances, some reflection occurs. If a normal (line at right angles to the surface) is drawn at the point of reflection, the angle of incidence will always equal the angle of reflection. This is known as the Law of Reflection.

law of reflection applies on a large scale. All the light travelling in one direction and reflecting from the mirror is reflected in one direction; reflection from such objects is known as specular reflection. Most objects exhibit diffuse reflection, with light being reflected in all directions. All objects obey the law of reflection on a
