### **Parentdocument Javascript - learn-hindi-online.com**

I have seen some elegant solutions on fetching the parents document from iframe - like e.g. this one. However, I can't make it work - and I didn't think this was possible due to securities issues (...)

### **javascript - Getting parents document from iFrame - Stack ...**

I'm trying to write a JavaScript application that will load a button up in an iFrame on a page. This application will read the parent document and strip out all images, apply minimal styling and reload the parent with this newly marked up page. The problem I am having is reading and writing the parent document from the iFrame.

### **javascript - Reading parent document from iFrame and ...**

It seems you want to change the src attribute of the frame workSheet. However, that frame doesn't have an id but just a name. That's why it fails in all browsers but IE: IE - at least some version of IE - doesn't make any difference between name attribute and id attribute, that's why it returns the object. You can either add an id to the frame (as you have done with frmContent) or using ...

### **how to use parent.parent.document.getElementById on ...**

I have done some research, but as a JavaScript novice, I can't seem to get anything to work for my specific case: I have an iframe in a page, and in that iframe's document, I have the following code:  
function fun(){ var slideTitle = api.getField('title');  
parent.document.getElementById("slidecaptionOoH").innerHTML = slideTitle;

### **javascript - parent.document.getElementById("...") is null ...**

Trying pass variable from one iframe to another. Sound weird but I made a picture to make it clear: My first try to add new srcrpt to the new iframe. Looks like its work, but new variable undefin...

### **Set javascript variable from one iframe to another - Stack ...**

Access a Parent Element With JavaScript or jQuery Often you'll want your JavaScript functions to access parent elements in the DOM. To accomplish this in JavaScript, try element.parentNode .

I have a page we can call parent.php. In this page I have an iframe with a submit form and outside

of that I have a div with the id "target". Is it possible to submit the form in the iframe and when

### **javascript - Access elements of parent window from iframe ...**

Definition and Usage. The `contentDocument` property returns the Document object generated by a frame or iframe element. This property can be used in the host window to access the Document object that belongs to a frame or iframe element. Note: Because of security reasons, the contents of a document can be accessed from another document only...

### **HTML DOM IFrame contentDocument Property - W3Schools**

In javascript is there an easy way to target the parent of a parent? I'm using `this.parentNode` as the element of a function to select the parent, and I tried both `this.parent.parentNode` and `this.parentNode.parentNode`, but both simply return the direct parent. I'm trying to affect the div surrounding the div surrounding the 'this'.

### **javascript parent of parent - Stack Overflow**

The `parent()` method returns the direct parent element of the selected element. The DOM tree: This method only traverse a single level up the DOM tree. To traverse all the way up to the document's root element (to return grandparents or other ancestors), use the `parents()` or the `parentsUntil()` method.

### **jQuery parent() Method - W3Schools**
