Philips Colour Temperature Guide

Color temperature defines the color appearance of a white LED. CCT is defined in degrees Kelvin; a warm light is around 2700K, moving to neutral white at around 4000K, and to cool white, at 5000K or more. Note that CCT does not tell you anything about the color rendering ability of the LED.

What does correlated colour temperature ... - Philips Lighting

Colour temperature is indicated in a unit called Kelvin (K). A low colour temperature creates a warm, cosy light effect, while a high colour temperature creates a cool, more energising effect. The majority of Philips LED lighting products provides 2700 Kelvin, which is warm white light.

Warm white LED and daylight LED | Philips Lighting

According to Catherine Feliz, a lighting product manager at Philips, the Hue system has four preset "recipes" for color temperature built into its app: relax, reading, concentrate, and energize.

How to optimize your home lighting design based on color ...

Available in a broad range of colors and sizes, including soft white or daylight plus for extra brightness. Find circuline, U-bent, and linear tubes. Philips also has fluorescent tubes for aquariums lighting and black lights for special effects. Innovation has reduced the mercury level in Philips tubes without sacrificing life or performance.

Fluorescent tubes | Philips Lighting

The Philips Hue White Ambiance bulbs cover the color temperature range from as low as 2200K, which is closer to the warm glow of the sun at sunrise and sunset, to as high as 6500K, which mimics the cooler tones of the sun high in the midday sky.

You Can Tweak the Warmth of Philips' New White Hue Bulbs ...

The White Ambiance kit lets you adjust the color temperature of the bulbs, so you can go from a more intense blue-white when you need to concentrate, to a softer yellow-white when you want

something less intense. This kit also comes with a handy dimmer switch, so you don't need to open the Philips Hue app to control the lights.

Philips Hue Lights: A Guide to What Each Does (and Costs)

Fluorescent Lamp Colours. Conversely the use of warm colour temperatures at high illumination levels yields an unpleasant insipid yellow hue to the surroundings which disturb the feeling of well-being. The matching of the illumination level to the desired colour temperature is a key point that is often overlooked in modern lighting design.

The Fluorescent Lamp - Choice of Colours

Colour temperature is a term used to indicate the type of white light that a light source emits. From 2700K warm white to 4000K cool white, there are many different colour temperatures to choose from. Here we explain the difference between them and how to find the right one.
