Paper Cone Subwoofer

Speaker cones seem to be made out of a lot of different materials. Hasn't some particular material emerged as the best to be used or is it just the manufacturers want to have something unique to their own speakers? One of those debates which had been raging for decades is about metal vs. paper or ...

The Wavecor SW275BD02 is a 10-3/4" mica-paper composite cone subwoofer that is equally at home in a home theater or hi-fi installation. This driver utilizes a very rigid mica-paper composite cone to ensure piston motion at high levels for reduced distortion.

Wavecor SW275BD02 10-3/4" Mica/Paper Cone Subwoofer 8 Ohm

Turn to the "Cone Body Coatings and Treatments" section of the manual, next. The general characteristics of paper materials used in our speaker cones can be modified with certain treatments. These chemical additives, when applied by absorption or saturation, modify the general characteristics of a paper cone body.

Using the Speaker Cone Catalog - Loudspeaker Components ...

As the cone moves back and forth, air is displaced and sound is created. Without this crucial piece, your sub would be useless and your music would suffer drastically. But what exactly does a subwoofer cone do and what makes a high quality cone? Essentially the only moving part in a sub is the cone, making this piece one of the most important.

Types Of Subwoofer Cones - Blog | Sonic Electronix

If, on the other hand, you expect to cross over an 8 inch speaker with a 6 inch cone to a 1 inch dome tweeter at 2000 Hz (typical), then it is unlikely you will ever find anything affordable to do the job better than paper. Calling loudspeaker cones paper is a bit like calling everything that grows and converts CO2 into oxygen "vegetables".

SS Audio Recone Kits - Simply Speakers

Loudspeaker. In a dynamic loudspeaker, a diaphragm is the thin, semi-rigid membrane attached to the voice coil, which moves in a magnetic gap, vibrating the diaphragm, and producing sound. It can also be called a cone, though not all speaker diaphragms are cone-shaped. Diaphragms are also found in headphones.. Quality midrange and bass drivers are usually made from paper, paper composites and ...

Diaphragm (acoustics) - Wikipedia

Paper is a fine material for speakers, it's light and rigid. I'd be willing to bet that a fair number of high end speakers (Subs in particular, I'd wager) use treated paper cones.
