Recycling Research Paper

Process. The process of waste paper recycling most often involves mixing used/old paper with water and chemicals to break it down. It is then chopped up and heated, which breaks it down further into strands of cellulose, a type of organic plant material; this resulting mixture is called pulp, or slurry.

Paper recycling - Wikipedia

With paper comprising up to 40% of the municipal solid waste stream, paper recycling is an obvious and easy way to reduce waste in the workplace. By recycling paper and using recycled paper, trees are spared -- every ton of paper made from recycled fiber saves approximately 17 trees. Cutting down ...

Office Paper Recycling | GreenBiz

Recycling is the process of converting waste materials into new materials and objects. It is an alternative to "conventional" waste disposal that can save material and help lower greenhouse gas emissions. Recycling can prevent the waste of potentially useful materials and reduce the consumption of fresh raw materials, thereby reducing: energy usage, air pollution (from incineration), and water ...
