At the same time, in the first hours after injury, a cold is shown, and then a local therapeutic treatment for resorption of hematoma. Thus, immediately after the injury, ice should be immediately applied to the area of the sacrum (snow, a bubble filled with cold water, a towel soaked in cold water, etc.).

Rump injury - symptoms, effects and treatment

We present a case of enormous and spontaneous chronic haematoma of the back, expanded from the lower thoracic area to the sacral area, in a young patient without any history of trauma or chronic coagulopathy. The MRI scan is very useful in preoperative diagnosis, however only the histopathological ...

Metanephric dysplastic hematoma of the sacral region (MDHSR) has been described by Cozzutto and Lazzaroni-Fossati in 1980, by Posalaki et al. in 1981 and by Cozzutto et al. in 1982. Three additional cases were seen by Finegold. The case reported by Cozzutto and Lazzaroni-Fossati involved a premature male newborn with bilateral renal dysplasia and a sacrococcygeal mass featuring a histological ...

Metanephric dysplastic hematoma of the sacral region ...

Chronic expanding haematoma (CEH) is a very infrequent event with imprecise developmental mechanism and is rarely reported in literature. We present a case of enormous and spontaneous chronic haematoma of the back, expanded from the lower thoracic area to the sacral area, in a young patient without any history of trauma or chronic coagulopathy.

Coccyx or Sacrum Contusion. You have a contusion (bruise) of the coccyx or sacrum. The sacrum is the triangular bone at the base of the spine that joins the pelvic bones. The coccyx (tailbone) is the last bone of the sacrum that hangs down in a point like a small tail. Symptoms include swelling and some bleeding under the skin.
