The following links describe a set of basic PCL tutorials. Please note that their source codes may already be provided as part of the PCL regular releases, so check there before you start copy & pasting the code.

Documentation - Point Cloud Library (PCL)

Introduction. MultiQC is a reporting tool that parses summary statistics from results and log files generated by other bioinformatics tools. MultiQC doesn't run other tools for you - it's designed to be placed at the end of analysis pipelines or to be run manually when you've finished running your tools.

Documentation: MultiQC

Introduction. The Distance Matrix API is a service that provides travel distance and time for a matrix of origins and destinations. The API returns information based on the recommended route between start and end points, as calculated by the Google Maps API, and consists of rows containing duration and distance values for each pair.. Note: This service does not return detailed route information.

Using style sheets¶. The style package adds support for easy-to-switch plotting "styles" with the same parameters as a matplotlib rc file (which is read at startup to configure matplotlib).. There are a number of pre-defined styles provided by Matplotlib. For example, there's a pre-defined style called "ggplot", which emulates the aesthetics of ggplot (a popular plotting package for R).

Customizing Matplotlib with style sheets and rcParams ...
