The items of the final 32-item Humor Styles Questionnaire are presented in Table 1, along with their Varimax-rotated factor loadings, based on the combined data from all participants in the scale development studies. These data involve 1195 participants (725 women and 470 men), ranging in age from 14 to 87 years (mean age=25, SD=15.68). As shown in the table, all item loadings are over .40 on ...

Individual differences in uses of humor and their relation ...

A social skill is any competence facilitating interaction and communication with others where social rules and relations are created, communicated, and changed in verbal and nonverbal ways. The process of learning these skills is called socialization. For socialization, interpersonal skills are essential to relate to one another. Interpersonal skills are the interpersonal acts a person uses to ...

Social skills - Wikipedia

Before assessment can begin we must decide how quality is to be defined and that depends on whether one assesses only the performance of practitioners or also the contributions of patients and of the health care system; on how broadly health and responsibility for health are defined; on whether the maximally effective or optimally effective care is sought; and on whether individual or social ...

Participants were two groups of individuals with a diagnosis of schizophrenia or schizoaffective

disorder, and one group of healthy controls ().The HOS group (n = 26) was sentenced to compulsory mental care for homicide or homicide attempt.The non-HOS group (n = 28) had no history of interpersonal violence.Recruitment procedures were similar for HOS and non-HOS participants: Diagnostic ...

Large social cognitive impairments characterize homicide ...

Carers play a vital role in supporting family members who are sick, infirm or disabled. 1 There is no doubt that the families of those with mental disorders are affected by the condition of their near ones. Families not only provide practical help and personal care but also give emotional support to their relative with a mental disorder.

Review Article | British Journal of Medical Practitioners

How general practice nurses view their expanding role The purpose of this research was to explore the barriers and enablers that nurses working in general medical practice experience in relation to the Australian Government driven expansion of their roles (nurses working in general medical practice are titled general practice nurses in Australia).

Australian Journal of Advanced Nursing

History. This disorder was first defined in 1978 by Greek psychiatrist George N. Christodoulou, M.D., Ph.D, FRCPsych. Although the symptoms of subjective doubles have been described before 1978, the disorder was not given a name until Christodoulou called it the syndrome of subjective doubles in the American Journal of Psychiatry. The article describes an 18-year-old female suffering from ...
