Background. Severe atopic dermatitis (AD) has a high unmet need for effective and safe therapeutics. In early-phase trials, dupilumab, a fully human mAb targeting IL-4 receptor  $\alpha$ , markedly improved disease activity, but the effect of IL-4/IL-13 blockade on AD at the molecular level has not been characterized.

### **Dupilumab improves the molecular signature in skin of ...**

\*Online and phone registration is now closed.
