### **Cost Estimating Guide - Office of Science**

Delivering projects on-budget will always be a key success factor for a Project Manager. The Estimate Costs process in the Project Cost Management knowledge area is critical to delivering a project on-budget. In this article, examples of Analogous Estimating, Resource Cost Rates, and Bottom-up Estimating are provided. This is a key concept for your PMP preparation.

### **Examples of Estimating Costs in Project Management**

Bottom-up estimating allows you to create an estimate for the project as a whole. To analyze from the "bottom up," break larger tasks down into detailed tasks, and then estimate the time needed to complete each one. Because you're considering each task incrementally, your estimate of the time required for each task is likely to be more accurate.
