The video gives a step by step tutorial on how to replace the water pump, all belts and the shaft seals on a Porsche 944 S2. The video has a German soundtrack but English subtitles are available at YouTube.

How to Replace Water Pump, All Belts and Shaft Seals on a ...

The tolerances between the valves and pistons on some engines are very narrow, and this potentially disastrous dance between parts is all kept in harmony by the timing belt and tensioners.

Camshafts & Timing Chains - Auto Parts and Accessories

Timing Belt/Balance Shaft Belt: The most critical maintenance item on the car. A broken timing belt will destroy your valves, resulting in a very expensive repair bill. Replacement every 30,000 - 35,000 miles. Additionally, the belt should be re-tensioned 1000 miles after installation, and every 15,000 miles after that.

Buyer's Guide: 924S/944/S/S2/951/968 - Pelican Parts

In addition to the concern that 8V 944s have with regard to timing belt maintenance, 16V 944 owners must also be concerned with the maintenance of the timing chain and tensioner. On the 8V 944s, valve timing for both the intake and exhaust valves is accomplished by a single overhead camshaft.

Camshaft Chain and Tensioner Replacement (16V Engines)

Make sure that the tool's tensioning roller is on the toothed side of the belt. NOTE. When checking timing belt tension, the timing belt tool is installed such that the gauge on the tool is oriented upside down. It also requires the flat bars on the tool to slide between the timing belt and the timing belt cover which is a snug fit.

Timing Belt and Balance Shaft Belt Tensioning

Beginner's Guide: What Is a Timing Belt/Chain (and What Does It Do)? ... Timing belts tend to simply snap, which can cause damage in an instant, as valves stuck open at the wrong moment hit the top of the rising piston. Such damage can destroy an engine completely, or lead to a multi-thousand dollar repair bill, hence the increasing popularity ...

THE 928 TIMING BELT AND TENSIONER SYSTEM Wally Plumley — 928 Specialists The toothed camshaft drive belt, more commonly referred to as the timing belt, and its tensioner, make up one of the most critical of the 928's subsystems. This toothed rubber and fabric belt is responsible for

THE 928 TIMING BELT AND TENSIONER SYSTEM

While it seems logical that two guides are better than one, it isn't always true! Two guide strips require more precision in the conveyor design and in the placement of the guides on the belt. However, when two guide strips are required, the critical dimension is the center to center distance of the guide strips from each other.
