try plugging in a blue ray player using the same cable and port on the TV. If it works, "hot swap" it over to the computer. You might have some form of "hot plug detection" issue which computers / monitors used to start communications between devices... perhaps one or the other isn't following "protocol".

The graphics display resolution is the width and height dimension of an electronic visual display device, such as a computer monitor, in pixels. Certain combinations of width and height are standardized and typically given a name and an initialism that is descriptive of its dimensions. A higher display resolution in a display of the same size means that displayed photo or video content appears ...
