Puppylinux 7.5 'Xenialpup' is ready to breathe new life ...

Puppy Linux History. Puppy Linux was originally created by Barry Kauler in 2003, as a smaller, leaner version of Vector Linux.. From the beginning, the idea was to make a small, lean, yet complete edition of Linux distribution that was useful from the get-go: the downloaded ISO contains all the standard applications to handle usual computing needs: word processor, spreadsheet, and web browser.

1. Why this guide? Many people still believe that learning Linux is difficult, or that only experts can understand how a Linux system works. Though there is a lot of free documentation available, the documentation is widely scattered on the Web, and often confusing, since it is usually oriented toward experienced UNIX or Linux users. Today,

Introduction to Linux - Linux Documentation Project

This guide shows you how to create users within Linux using the command line. While many desktop Linux distributions provide a graphical tool for creating users it is a good idea to learn how to do it from the command line so that you can transfer your skills from one distribution to another without learning new user interfaces.

How to Create Users in Linux Using the "useradd" Command

I went with the Plain Old Puppy (aka 'pop') theme in 32 as to not alienate too many users. If you want to change it check out PTheme in the menu. Standard in woof are ziggy's stardust dark and light but I concocted 'buntoo' and 'pop'. There was a bit of contention in the woof-CE forum.. so I took matters into my own hands.
