May not work well in current browsers since this is not standard yet. CSS Print Profile, W3C Working Group Note 14 March 2013 (as

### **CSS for print tutorial - EduTech Wiki**

There isn't an actual page-break property in CSS. It is actually a set of 3 properties: page-break-before, page-break-after and page-break-inside. These properties help define how the document is supposed to behave when printed. For example, to make a printed document more book-like.

### **page-break | CSS-Tricks**

HTML and CSS, two of our favorite acronyms, are normally associated with web pages. And deservedly so: HTML is the dominant document format on the web and CSS is used to style most HTML pages. But, are they suitable for off-screen use? Can CSS be used for serious print jobs? To find out, we decided to take the ultimate challenge: to produce the next edition of our book directly from HTML and ...

### **Printing a Book with CSS: Boom! - A List Apart**

I have looked into @media print, but that doesn't have any hooks for creating headers and footers. and I can ... The only time I would want to use a page-break is if it were a new chapter, as chapters should always start on a new page. ... it could be done by pure HTML and CSS but definitely not the way to go as it would become very frustrating ...

### **CSS Reference - W3Schools**

CSS2 Introduced Media Types. The @media rule, introduced in CSS2, made it possible to define different style rules for different media types.. Examples: You could have one set of style rules for computer screens, one for printers, one for handheld devices, one for television-type devices, and so on.

### **CSS Media Queries - W3Schools**

This is a great start but I had two troubles with it: for one if any of the element's parents established its own relative/absolute positioning the content would still be offset unless I used position:fixed instead. However, Chrome and Safari would also truncate content, especially after the first page.
