Thus far we have discussed experimental and nonexperimental approaches to drawing causal inferences about the presence and effects of racial discrimination in one or more domains. As discussed in the previous chapter, a primary challenge to researchers attempting to draw such inferences is the inability to identify and control for all the characteristics that might affect an outcome.

Read "Measuring Racial Discrimination" at NAP.edu

Persistent racial inequality in employment, housing, and a wide range of other social domains has renewed interest in the possible role of discrimination. And yet, unlike in the pre-civil rights era, when racial prejudice and discrimination were overt and widespread, today discrimination is less readily identifiable, posing problems for social scientific conceptualization and measurement.

Race and Multiracial Americans in the U.S. Census | Pew ...

A race is a grouping of humans based on shared physical or social qualities into categories generally viewed as distinct by society. First used to refer to speakers of a common language and then to denote national affiliations, by the 17th century the term race began to refer to physical (phenotypical) traits. Modern scholarship regards race as a social construct, an identity which is assigned ...
