Scratch contains the resources available for creating a question/answer system. This system can be used for one to be "quizzed", or to repetitively answer automated questions. This tutorial shows various methods on how to create a question system.

### **Creating a Quiz - Scratch Wiki**

I recently took a programming test on paper. My material was very basic, although I still had to write without a computer - and what I did was simply write the program with all my notes and comments and such onto a piece of scratch paper. Once I knew the program worked, I simply rewrote all the code onto the actual test sheet.
