8 Learning to Program with Visual Basic and .NET Gadgeteer OBJECTIVES OF THIS BOOK This book is intended for school students and others learning to program in Visual Basic. It assumes no prior knowledge of programming, electronics, Visual Basic or the Visual Studio environment. Programming concepts are introduced and explained throughout the book.

### **LEARNING TO PROGRAM WITH VISUAL BASIC AND .NET GADGETEER**

Assuming the properties used data annotations, how would I be able to do so with out using reflection? If I were using .net 4.0 or anything upwards I would have used the Validator Class from the DataAnnotations assembly, but since I am bound to a 3.5 framework, reflection seems to be the only viable option for me.

### **How to get properties from nested object using reflection ...**

All this must not relate to any Data in a Database but rather reflection to get value of the property. and right now all I've been able to access is the DataContext.PropertyOfSomeKind. but when time comes to access the property of a property which is an object then it's like I have a missing piece between

### **Reflection question - social.msdn.microsoft.com**

I would like to know, inside the "DoSomething()" method, if there is a way with reflection to get the instantiated "MyObject" class that contains it? My first assumption is no, I'm not sure that the "MyObjectProperty" will have the appropriate context to retrieve that... I've tried all sort of things, and my brain is now exhausted trying.
