It is common to use unattended install from a LAN drive. Ensure you copied all files for each type of endpoint into a single directory, rather than into separate diskette images, and ensure you created your initial update.iss file from that directory. Unattended install does not keep track of diskette label information, and will need user input if you install from separate disk images.

Installing Performance Endpoints. Because the Performance Endpoints runs as a service, after you install it, a window is not displayed. The endpoint program waits for incoming test requests, then executes those tests when the requests are received. For detailed information, see Installing Endpoint in the NetIQ Performance Endpoints 5.1 User Guide.
