Conceptual Physics Notes - Loudoun County Public Schools

Ch 38 Review Answers: In physics, a model describes a way to imagine or visualize (picture) a concept or phenomenon. Often, a scientific theory is called a model because, at least in classical physics, a theory is considered to be an explanation of why something happens the way it does. For example, two models for the nature of light are "Light is made of particles."

Ch 38 Assignment Answers - BCSC Website

Conceptual Physics Reading and Study Workbook N Chapter 38 325 Summary Material particles and

light have both wave properties and particle properties. 38.1 Models Through the centuries there have been two primary models of light: the particle model and the wave model.
