Harvard is a style of referencing, primarily used by university students, to cite information sources. Two types of citations are included: In-text citations are used when directly quoting or paraphrasing a source. They are located in the body of the work and contain a fragment of the full citation.

In finance, a derivative is a contract that derives its value from the performance of an underlying entity. This underlying entity can be an asset, index, or interest rate, and is often simply called the "underlying." Derivatives can be used for a number of purposes, including insuring against price movements (hedging), increasing exposure to price movements for speculation or getting access ...
