Reflective Practice. experience for the individual" (Ashby, 2006 p.28). Reflective practice is vital to the nursing profession. Although there is little evidence based information of the benefits of reflective practice (Schutz, 2007), there are many benefits pertaining to reflective practice and resulting in a holistic patient approach and therefore nurses are able to provide better care.

Abstract. The notion of paying college football players has been an ongoing debate since the early 1900's. With current television revenue resulting from NCAA football bowl games and March Madness in basketball, there is now a clamoring for compensating both football and basketball players beyond that of an athletic scholarship.

Occupational inequality is the unequal treatment of people based on gender, sexuality, height, weight, accent, or race in the workplace. When researchers study trends in occupational inequality they usually focus on distribution or allocation pattern of groups across occupations, for example, the distribution of men compared to women in a certain occupation.
