Robert Manna recently posted some observations about the new Guide Grid feature that arrived with Revit 2011. It is intended to provide a bit more control over the view alignment between sheets. I complained about this process in an earlier post. It was only a month or so later that I saw a sneak peak of the Guide Grid concept.

**Revit OpEd: Guide Grids**

Yeah, I just can't think of a really good use for Guide Grids. Our TB grids match the cell division of the TB so probably most teams won't snap a view directly to our "grids" but you can easily offset the view by 1/2" or something. With the limitation of a single grid dimension in Guide Grids it is really quite handi-capped.
