Photo.net Photography Forums. Forums > Equipment > Nikon > Nikon Z7 Auto Focus Guide. Discussion in 'Nikon' started by ShunCheung, Dec 26, 2018. ShunCheung Administrator. Not sure how many Nikon Z mirrorless users are among us. It looks like Nikon came up with this guide back in November (2018):

Nikon Z7 Auto Focus Guide | Photo.net Photography Forums

Focus Mode (Viewfinder Photography) Autofocus is performed when the shutter-release button is pressed halfway. The photographer can choose whether the camera locks or continues to adjust focus while the shutter-release button is pressed halfway. The setting that controls this behavior is focus mode.

Focus Mode (Viewfinder Photography) - Nikon

Predictive Focus Tracking. In AF-C mode or when continuous-servo autofocus is selected in AF-A mode during viewfinder photography, the camera will initiate predictive focus tracking if the subject moves toward the camera while the shutter-release button is pressed halfway. This allows the camera to track focus while attempting to predict where the subject will be when the shutter is released.

Best Nikon Autofocus Modes Tutorial Guide [UPDATED 2019]

A sliding focus ring means you can instantly switch between automatic and manual focusing, which is helped out by the HSM system it uses. Like the Nikon model, this lens has image stabilization features which make it possible to take pictures whilst holding the camera, although for more detailed shots you'll still want to use a tripod.

Best Nikon Macro Lenses (Updated for 2019) - What ...

Manually focusing the camera is perhaps the most frustrating barrier between good and great photography. Achieving perfect focus requires using the distance measurements on the lens barrel and even perhaps measuring the distance from the lens to the subject with a tape measure; high-end photographers shoot products this way, and so do fine art photographers who are using medium format cameras.
