phyloT generates phylogenetic trees based on the NCBI taxonomy. From a list of taxonomic names, identifiers or protein accessions, phyloT will generate a pruned tree in the selected output format. Complete clades can be simply included, with interruption at desired taxonomic levels and with optional filtering of unwanted nodes.

phyloT : a phylogenetic tree generator

INTRODUCTION. With the exponential increase of sequence data being generated by various classical and next-generation sequencing studies (), phylogenetics and phylogenetic trees are

becoming an integral part of various biological studies. Through the years, many tools have been developed, covering all possible aspects of classical tree visualization.
