With a mission to spark children's learning through play, Minnesota Children's Museum provides hands-on learning experiences to more than 400,000 visitors each year in Minnesota, as well as millions of children around the country

THE POWER OF PLAY - childrensmuseums.org

1. Introduction. Bone regeneration has been a major challenge in clinical surgery owing to conditions such as trauma, tumor and diseases (osteomyelitis and osteitis) .Many therapeutic and research approaches such as allografts, xenografts, autografts and other artificial substitutes have been employed to restore the function and structure of defect bones , .

Bacterial cellulose-based scaffold materials for bone ...

We are applying our knowledge of signaling networks to engineer cells with custom therapeutic responses. We are focusing on engineering T cells, as T cells armed with synthetic chimeric antigen receptors (CARs) have proven to be a highly effective clinical platform for recognizing and killing cancer cells.
