Prostate specific antigen (PSA) is a protein produced primarily by cells in the prostate, a small gland that encircles the urethra in males and produces a fluid that makes up part of semen. Most of the PSA that the prostate produces is released into this fluid, but small amounts of it are also released into the bloodstream.

The clinical guideline on Early Detection of Prostate Cancer discusses the detection of disease at an early, pre-symptomatic stage through the use of screening tools, such as PSA. Early detection allows for more conservative management, if needed, via means such as active surveillance and watchful waiting.
