The economics of happiness or happiness economics is the quantitative and theoretical study of happiness, positive and negative affect, well-being, quality of life, life satisfaction and related concepts, typically combining economics with other fields such as psychology, health and sociology. It typically treats such happiness-related measures, rather than wealth, income or profit, as ...

Several potential models of how gratitude, social support, stress, and depression could relate to each other over time are presented in Table 1 (see also Fig. 1). Model 1 is a stability model, where no variable leads to any other over time, but the variables exhibit a degree of temporal stability (test-retest reliability), and are perhaps correlated at each time point.
