PHP is a server scripting language, and a powerful tool for making dynamic and interactive Web pages. PHP is a widely-used, free, and efficient alternative to competitors such as Microsoft's ASP.

## PHP 5 Tutorial - W3Schools

The issue involving some sites requiring a valid user-agent string when using fopen can easily be resolved by setting the user\_agent string in the PHP.INI file. If you do not have access to the PHP.INI file, then the use of ini\_set('user\_agent','Mozilla: (compatible; Windows XP)'); should also work. The actual agent string is up to you.

## PHP: fopen - Manual

The PHP manual is available in a selection of languages and formats. Pick a language and format from the table below to start downloading. Notes to read before you download. The English version should be considered the most accurate, since translations are based on that version. Most of the translations are not complete, and contain English parts.
