Diamond is a solid form of the element carbon with its atoms arranged in a crystal structure called diamond cubic. At room temperature and pressure, another solid form of carbon known as graphite is the chemically stable form, but diamond almost never converts to it. Diamond has the highest hardness and thermal conductivity of any natural material, properties that are utilized in major ...

A chemically pure and structurally perfect diamond is perfectly transparent with no hue, or color. However, in reality almost no gem-sized natural diamonds are absolutely perfect. The color of a diamond may be affected by chemical impurities and/or structural defects in the crystal lattice. Depending on the hue and intensity of a diamond's coloration, a diamond's color can either detract from or ...

This is a tragic one. When I was a kid, Rhode Island Mall was the mall. I always derisively labeled the neighboring Warwick Mall-the successful one today-as the "clothes mall." Rhode Island Mall was the fun mall. It had the Aladdin's Castle arcade, it had video game stores, toy stores, and everything else a kid [...]

This is a ripoff site posing as an auction when really it's a jewelry store selling thier items. I too have bid on this site about 20 times, was not the high bidder on any of them, but was offered a second chance but at a substantially higher rate because they miraculously found another item exactly them same as the one I bid on.
