It is your very own times to achievement reviewing habit. in the midst of guides you could enjoy now is patty paper conics below.

Patty Paper Conics

Students fold "patty paper" to create each of the conic sections, one at a time. They create three "layers" for each conic section. For the parabola, they fold one layer to create a parabola, a second layer that shows the relationship between the focus and the latus rectum, and a third layer that examines the locus of points.

Wax Paper Folding - Discovering the Conic Sections

This lesson is an introduction into conic sections using Styrofoam cups and then taking a closer look at the parabola by using patty paper to show students how a parabola is formed by a focus and a directrix.
