Radio is the technology of signalling or communicating using radio waves. Radio waves are electromagnetic waves of frequency between 30 hertz (Hz) and 300 gigahertz (GHz). They are generated by an electronic device called a transmitter connected to an antenna which radiates the waves, and received by a radio receiver connected to another antenna. Radio is very widely used in modern technology ...

Tecsun S-8800 Review. by 13dka. Looking for a new toy again I recently revisited the Tecsun S-8800, which looked like it could replace both my battered old Grundig Satellit and my Tecsun PL-660. Being in production for a few years now, and with the "birdies" situation ironed out long ago, the S-8800 has gathered much acclaim by now but also a few somewhat contradicting reviews.

Tecsun S-8800 review | The SWLing Post - Shortwave radio

This is the very source of cheap Moog bass! It is a lot like the strap-on Moog Liberation in its design and architecture and also looks and sounds very much like the Moog Rogue. The MG-1 was built by Moog for Realistic (Radio Shack), and was designed specifically for the home market. Very basic and easy to use, this is a nice cheap way to get your hands on Moog sounds!

Realistic Concertmate MG-1 | Vintage Synth Explorer

Be sure to initially give your Kiwi a connection to the Internet and let it update to the latest software release. If you're using the software installed by the factory (v1.2) you may not hear audio due to recent browser changes preventing the autoplay of audio and video.
