.NET supports two types of string formatting. I'm in a situation where existing configuration data has #,##0 style formatting. A new feature requires formatting to the same output, but the API needed for this feature only accepts formatting of type {0:n2}.. Does anyone know of a means to convert between these two representations for numeric types?

How to convert between "#,##0" and "{0:n2}" style format ...
SECTION-D. Question 23. An aeroplane left 30 minutes later than its scheduled time; and in order to reach its destination 1500 km away in time, it has to increase its speed by 250 km/hour from its usual speed.
