I'm currently working on a frame and as I'm new to Linux I depended heavily on the code you presented here. Despite my naivety I managed to whip up what I consider to be an improvement to your cron_reload_frame that will restart feh only if and when the local image files change.That way cron can run the script every couple of minutes and feh only restarts if there is a change.

We will be using Bash, an acronym [3] for "Bourne-Again shell" and a pun on Stephen Bourne's now classic Bourne shell. Bash has become a de facto standard for shell scripting on most flavors of UNIX. Most of the principles this book covers apply equally well to scripting with other shells, such as the Korn Shell, from which Bash derives some of its features, [4] and the C Shell and its variants.

This section is a very abridged introduction to computer science and contains the bare minimum that I think you need to learn before being able to see programming as "not magic." The first chapter is an installation guide and an introduction to the command line. The chapter after that exist solely as a copy-and-paste exercise, so you can at least experience how easy it is to run code.
