The first edition, published in 1973, has become a classic reference in the field. Now with the second edition, readers will find information on key new topics such as neural networks and

statistical pattern recognition, the theory of machine learning, and the theory of invariances. Also included ...

Pattern Classification by David G. Stork - Goodreads

The optimal classifier over all functions mapping X into $\{-1, 1\}$, also known as the Bayes classifier (Duda et al., 2012), can be expressed as If we fix k α (or equivalently, fix α) to have fixed specificity sp 0 , then the Neyman- Pearson lemma ensures that $D * α (X)$ maximizes sensitivity across all classifiers with specificity equal to sp 0 .
